RHINGLABELS

LABELS THAT STICK AND LAST

A portable label printer is only as good as the labels on which it prints. That's why DYMO has designed a series of labels for almost any type of application on a wide variety of surfaces. Designed to work with the RHINO series of portable label printers, these labels stick and stay stuck.

FLEXIBLE NYLON

The principal application for RHINO labels is wire and cable wrapping.
The flexible nylon labels are made of memory-resistant materials, making them ideal for wrapping around curved surfaces such as wires and cables, and the adhesive will stick and stay stuck for the lifetime of the cable

HEAT SHRINK TUBES

Looking for a non-adhesive yet permanent solution to identify and protect your wire and cables at the same time? DYMO's heat shrink 1:3 polyolefin tubes provide clean and permanent

marking for a wide range of cable diameters. These sleeves are applied before connection and can be permanently positioned after connection when shrunk with a heat-qun.

PERMANENT POLYESTER

This permanent polyester material stands up to the most demanding uses in industrial environments. Designed for application to extremely rough surfaces where increased adhesion and resistance to dirt and oils are required. Ideal for patch panels, racks, enclosures, factory equipment and much more.

COLOURED VINYL

Coloured vinyl labels are a perfect solution if you want your identification to be clearly understood. The strong adhesive and flexible material makes this vinyl tape ideal for many labelling applications such

as warning and safety instructions on machines and equipment, wires and cables, etc

CLEAR POLYESTER

Clear polyester offers an aesthetic way of labelling appli-

cations. The clear labels with the sharply printed black characters integrate very well into the structure and background of the application. Any text looks as if it was printed directly onto the surface.

NON-ADHESIVE TAGS (INSERTS)

This non-adhesive polypropylene solution is tear-proof and offers a flexible way of providing high-quality on-the-spot labelling. You can cut the insert to the size you need that fits with any label holder. The label can easily be removed and replaced.

Easy-peel split-back label

STICK AND LAST

- Easy to peel, split-back labels.
- Permanent adhesive means labels stick and last in heavy duty environments.
 Thermal transfer print technology is durable, smear-proof, and resistant to chemicals and solvents.
