J-PLUG ANCHOR

J-Plug Anchor adds a lock slot that's compatible with
standard T-Bar Cable Locks.

HOW IT WORKS

Simply connect the J-Plug Anchor to your audio port and use an existing laptop security solution like a Kensington lock to secure your investment.

SECURE ANY LAPTOP

The J-Plug Anchor fits any Laptop with an Audio Port. From Laptops to convertibles, we've got you secured.
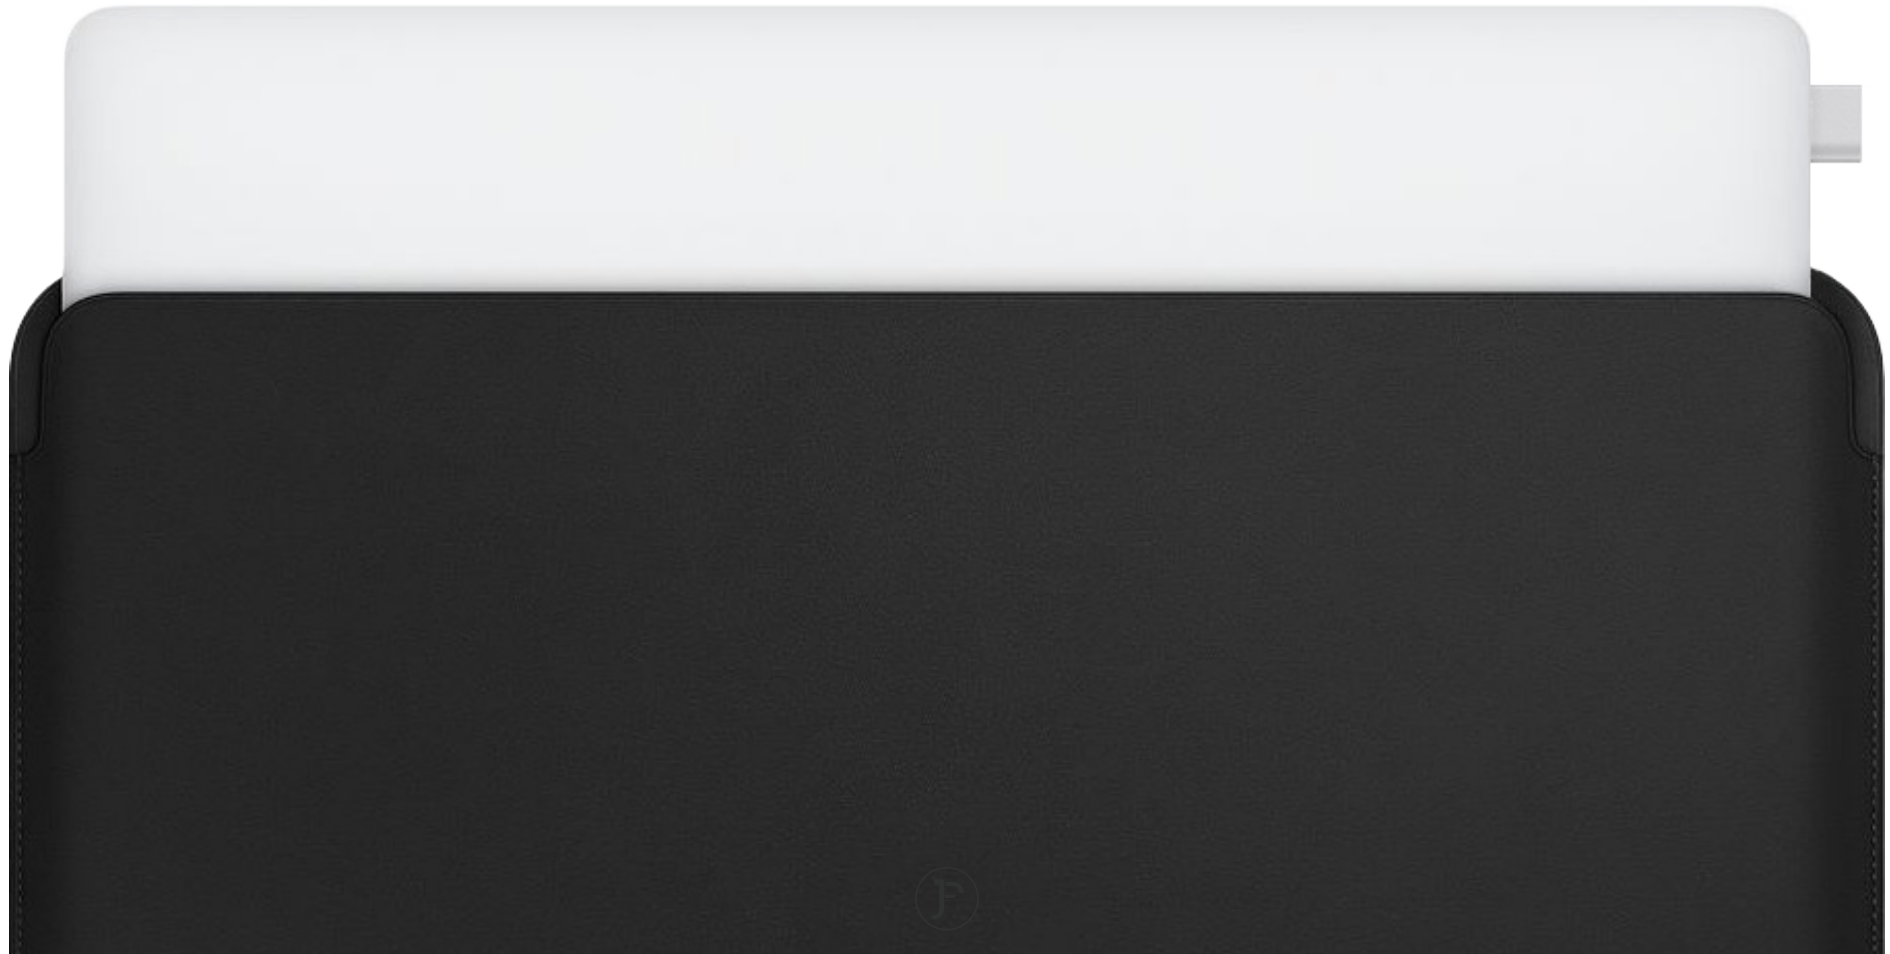

EASILY DETACHABLE

Install once, then attach and detach your existing security cable in seconds.
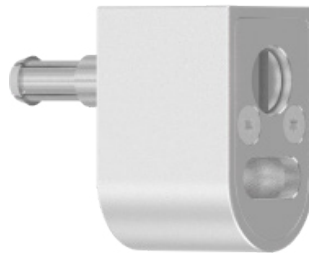

GO WITH YOU EVERYWHERE

J-Plug Anchor is small and lightweight, ensuring you can go
about your day without getting in your way.

J-Plug Anchor

OUR STORY

With thinner, lighter & new form factor Laptops arriving on the market there's no better time to buy.

As the Laptop market has changed, so has the ability to secure them. With manufacturers & designers working hard to squeeze that last 0.1mm from their designs, certain features have been removed, including the universal security anchor point.

That's where the new product from Multplx comes in. For the past 8 years we've produced high quality innovative solutions to secure mobile technology, solving the evolving security challenge.
