Patrol PA (L) 1-R - the compact 360° solution

Expansion of Patrol & Pyra Series with the reliable audible PA 1-R and combined PA L 1-R device.

The new PA (L) 1-R audible and combined signaling device convinces through its [radial coverage](#) which achieves [excellent perceptibility](#) in all directions. The design makes the devices [ideal for top-mounting](#) on equipment or machines and is therefore used as a single device solution. This helps to indicate or warn the entire surroundings, not just one side.

The device can be equipped with two different [multi-voltage power supplies](#), one operating within the range of 10 - 60 V DC, and the other within the range of 95 - 265 V AC. The combined PA L 1-R device has flexible LEDs, which are also available as a [one-fits-all RGB version](#). Note that as with all products of the Patrol & Pyra Series, there is also 3D-Coverage data available for every device of the PA (L) 1-R.

Benefits of the PA (L) 1-R:

- **Top-mounted installation** - Excellent 360° perceptibility thanks to radial design
- **Freely selectable tones** - Choose between 70 tones, plus the volume can be reduced
- **Selectable signaling mode** - Choose between continuous, blinking, flashing and rotating lights
- **Selectable Colour** with the RGB version - One light for all your needs
- **Multi-voltage-power supply** of 10-60 V DC and 95-265 V AC

The solutions for many industries and applications

The PA (L) 1-R can be used very flexibly and is particularly suitable for [control cabinets](#), in the [intralogistics](#), for [compact machinery](#), for [small battery systems](#) and for the [automation/status indication](#) of productions.
