

# OPTICAL TECHNOLOGY

When drive manufacturers test their products, they use Verbatim media. Its the global No.1 for a reason - guaranteed quality!

## M-DISC™ ARCHIVAL DVD R AND BDR

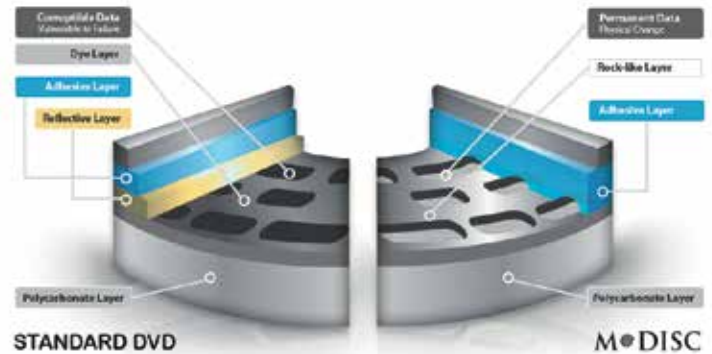

M-Discs have a projected lifetime of several hundred years (based on ISO/IEC 16963 testing) which makes them ideal for storing your most precious documents - files that you simply cannot afford to lose or become damaged. Unlike traditional optical media which utilize dyes, data stored on an M-Disc is engraved on a patented inorganic write layer which will not fade or deteriorate. This unique engraving process renders these archival grade discs practically impervious to environmental exposure, including light, temperature and humidity.

See [www.verbatim-europe.com/m-disc](http://www.verbatim-europe.com/m-disc) for more info.

## BLU-RAY

- High capacity for high definition (HD) video or long-term archiving
- Dual layer (DL) discs with two recording layers for 50GB storage
- BD-R XL - three recording layers for 100GB storage
