WEZ Kunststoffwerk AG

A Scherer Group company

Let us show you that

«Pleasure in the job puts perfection in the work».

Aristoteles

We have been shaping logistics solutions for over 60 years. You can put your trust in our employees, who work enthusiastically, creatively and with typical Swiss precision every day to satisfy our customers.

In this catalogue, you will find over 1000 items that will help you arrange your processes or workplace organization more efficiently, more comfortably or simply just more safely or more reliably.

Let one of our sales specialists provide you with inspiration or our team of experienced engineers help design your customised load carriers in plastic. We develop and produce high-quality plastic load carriers, containers and accessories in Germany, Italy and Switzerland at our three production locations and our own toolmaking plant.

Management of stackable containers

Storage

- The stackable containers have a uniquely small taper of 2 mm which means there is optimal filling or utilisation of the storage space.
- The containers are suitable for manual or automated handling depending on the container type and the design of the base.
- The loading of the container depends on the design of the base and can be between 10 and 65 kg.
- To meet specific requirements for storage space, handling and transport, we recommend our customised solutions with perfectly matched dimensions and properties.

Transport equipment

- Perforated containers provide good ventilation or cooling.
- Closed containers protect the contents against dust and to some extent against spray or contamination.
- Ideal for bulk or packaged food-stuffs, semi-finished products in manufacturing plants, consignment of goods in e-commerce, storage of small parts and handling of textiles.
- RFID or barcode labelling, hot embossing or engraving identify your load carriers perfectly.

ESD protection

- Blackline and Newbox Black products offer ideal ESD protection.
- ESD protection is very important, particularly where there are seasonal variations and low humidity.
- Attention is increasingly being given to ESD protection when it comes to the service and maintenance of vehicles, plant and machinery.

Packaging

- There are always appropriate foam or deep-drawn inserts available for every case to give optimal protection.
- Ideal self-organisation.
- Missing parts are recognised immediately.
- Packaging cases for high-grade electrical and measuring equipment.
- Case systems can also be used, for example, to create ESD-compliant environments during service and maintenance.

Technical information

Cleaning

- Suitable for fully automated washing systems up to 120 °C.
- Resistant to ultrasound.
- Suitable for stationary units.
- Suitable for mobile units.
- Resistant to all common detergents.
- We will gladly send you recommendations from suppliers and service providers on request.

Recycling

- Polypropylene is completely recyclable.
- Within a specifically defined loop, recycling has no difficulty conforming to food regulations and is harmless.
- During re-granulation residues, labels or printing are removed completely in a reliably controlled process.
- The cost of recycling is comparable to that for new items or even cheaper depending on the price basis.

Customised solutions

- Do you have any specific requirements or would you like to equip your storage system with customised load carriers? We will gladly design this for you and implement the solution with the help of our own tool and die shop.
- All our products are UV-stable, antistatic and dirt-repellent.

Standardisation

- All stackable containers offered in this catalogue conform to the current requirements of REACH and RoHS.
- Blackline and Logiline containers conform to the SGL standard, which is now integrated in GS1.
- The Newbox and Newbox Black containers conform to the DIN standard or the so-called Euro standard.
- The DIN and SGL standards are not compatible.

PCB HANDLING ESD

Our handling systems for printed circuit boards are particularly helpful when it comes to the reliable storage and transport of your electronic components. They help you keep your components safe and protect them against electrostatic discharge. Furthermore, in combination with Blackline stackable containers the four different printed circuit board systems also safeguard the contents against mechanical damage, contamination or moisture impact.

On the following page you will find an overview of our systems for printed circuit boards. Each has its own advantages and specific characteristics.

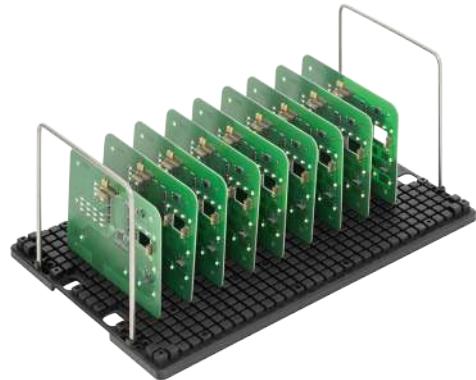

Special types

All non-stock items are marked thus and available on request.

PCB Holder

- Suitable for 400x300 mm and 600x400 mm Blackline containers lengthwise and crosswise and for carrying handle for 9980.026.

Printorama

- Suitable for 400x300 mm and 600x400 mm Blackline containers lengthwise and crosswise and for partitions lengthwise and crosswise.
- Height of slotted wall: 98 mm
- Individually adjustable to size of printed circuit board.

Rack-System 100

- Suitable for Blackline containers:
200x300 mm lengthwise
400x300 mm lengthwise and crosswise
600x400 mm crosswise.
- Height of slotted wall: 80 mm
- Individually adjustable to size of printed circuit board.

Rack-System 180

- Suitable for 400x300 mm and 600x400 mm Blackline containers lengthwise and crosswise.
- Height of slotted wall: 180 mm
- Height of double-slotted wall: 345 mm
- Individually adjustable to size of printed circuit board.

PCB HOLDER

PCB handling PH

Printed circuit boards are kept securely in place in the PCB Holder (insertion plate) by the various location slots of every size. The printed circuit board holders provide safe and reliable transport and protection against electrostatic discharge for your goods when placed in a Blackline container.

Applications

The PCB Holder range is ideally suited for storing and transporting electrostatic printed circuit boards.

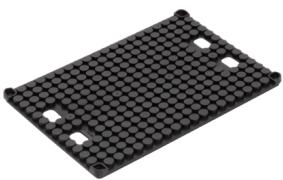

Tip

You will find the appropriate stackable containers in the Blackline section.

Special types

All non-stock items are marked thus  and available on request.

PRINTORAMA

PCB handling PA

The versatile Printorama system offers you special support during the manufacturing, storage and transport of printed circuit boards. With three finely adjustable slotted-wall elements, it is extremely flexible, can be customised and can meet every challenge. It is adaptable to your printed circuit boards whatever the size, is very easy to assemble and the system guarantees safe transport with ESD protection.

Slot dimensions

Division = 5.06 mm
Width = 2.50 mm
Depth = 3.00 mm

Printorama-Finder

With our Printorama Finder you can simply and easily find the right Printorama-configuration for the insertion dimension of your printed circuit boards! To do so, visit us at www.wez.ch.

RACK-SYSTEM 100

PCB handling RS100

The Rack-System 100 is the simplest and most reliable way to handle printed circuit boards with ESD protection. Just like using a construction kit, you can assemble your rack system using the different possible combinations. With integrated adjusting slot for the simplest and most efficient adjustment of size. Combined with our Blackline containers, you achieve perfect protection, even during transport.

Slot dimensions

Division	=	10.16 mm
Width	=	3.50 mm
Depth	=	2.50 mm

Quick and simple adjustment

The adjusting slot is marked with a rhombus and can be found at each end of the slot wall. It is 0.25 mm shallower than all other slots. Simply clamp the printed circuit board in the slot wall, screw the slot wall and aluminium profile, and you have already set the insertion dimension perfectly.

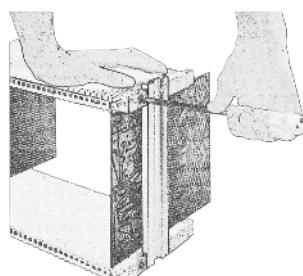

Figure showing slot lock

Applications

Rack-System 100 is extremely well-suited for the storage and transport of electrostatic printed circuit boards.

Tip

You will find suitable stackable containers in the Blackline section.

Special types

All non-stock items are marked thus and available on request.

BLACKLINE

The conductive SGL-standard stackable container of the Blackline range conforms to the requirements of the Swiss Logistics Association (Schweizerische Gesellschaft für Logistik, SGL). It is extremely well-suited for the consignment, storage and protection of electronic components during manual and mechanical handling. There are about 20 different sizes and a multitude of variants and the Blackline range is designed for industrial use. The thick-walled and extremely robust and dimensionally stable design will protect your parts for years.

Available sizes

Basic dimensions (LxW in mm)	External height (mm)					
200x150	100	145				
300x200	53	101	145			
400x300	53	101	145	212	278	320
600x400	56	101	145	212	278	320
						412

(depending on the base design, external height +3/+6 mm)

Special types

All non-stock items are marked thus and available on request.

ESD version

Every Blackline container carries the ESD logo and has a surface resistance of $<10^5$ Ohm.

**Tip**

The Blackline range offers comprehensive systems for the appropriate handling of printed circuit boards. Find out more in the following sections:

1. PCB Holders
2. Printorama
3. Rack-System 100
4. Rack-System 180

-------------	---------------	-------------	--------------	-----------	--------------	------------

BLACKLINE

SGL-standard container conductive BL

The conductive SGL-standard container from the Blackline range is appreciated by professionals because of its robustness and dimensional stability. It is precisely this stable design and the almost indestructible material that makes the Blackline container an extremely durable and sustainable all-rounder in ESD-protected applications.

Applications

Blackline stackable containers are extremely well-suited for the consignment, storage and protection of electronic components.

Special types

All non-stock items are marked thus  and available on request.

BLACKLINE

SGL-standard lid conductive BL

The conductive, dimensionally stable lid of the Blackline range is available in three designs: loose for placing on the container, with hinges and closures, and with four swing latches. It is adapted to the Euro-standard container, easy to handle and the wearing parts can be replaced at any time.

Applications

The Blackline lid combined with a Blackline container protects the contents of the container optimally against electrostatic discharge.

BLACKLINE

SGL-standard case conductive BL

The SGL-standard case of the Blackline range consists of a stackable container, Blackline hinged lid and a carrying handle that makes it practical and comfortable to carry the case.

Applications

The Blackline case makes it easier to transport the container manually. If accessories such as dividers, foam or insert boxes are added, it is an ideal tool case; however, it is also very well suited for other applications.

BLACKLINE

Dividers conductive BL

Blackline dividers allow Blackline containers to be subdivided flexibly. Thanks to the snap-in system, the dividers are held together firmly, even during cleaning or removal. The rounded edges and guide grooves make handling easy and comfortable.

Applications

Blackline dividers allow containers to be partitioned flexibly to meet specific requirements for tidiness and protection.

Suitable for 400x300 mm and 600x400 mm Blackline stackable containers.

Special types

All non-stock items are marked thus and available on request.

BLACKLINE

Foam cut-outs conductive BL

Blackline foam cut-outs in the lid, on the walls or on the base of the container prevent slipping or damage to the stored products. Different thicknesses and customised cut-outs (available on request) guarantee precise tailoring to your specific needs.

Applications

Blackline foam cut-outs allow the Blackline container to be arranged individually to satisfy your specific needs exactly.

Available sizes

Basic dimensions (LxW in mm)

400x300

600x400

Suitable for Blackline stackable containers.

Tip

If you wish, the foam can also be custom cut for other product ranges such as Newbox Black.

Special types

NEWBOX BLACK

Newbox Black conductive Euro-Norm stackable containers are available in about 20 different sizes and are ideally suited to storage, transport and protection of your electronic components. The containers are stackable with dimensions that match those of the Euro pallets. Compared with the Blackline range, the Newbox Black range impresses with a somewhat slimmer and lighter design that is nevertheless robust and dimensionally stable.

Available sizes

Basic dimensions (LxW in mm)	External height (mm)							
300x200	120	147	220					
400x300	120	170	220	270	320

NEWBOX BLACK

Euro-standard container conductive NB MC

The Euro-standard container of the Newbox range boasts a slim design. Thanks to its robustness and dimensional stability, the Newbox is a durable and economic product.

Applications

Newbox Black stackable containers are extremely well-suited for the consignment, storage and protection of electronic components.

NEWBOX BLACK

Euro-Norm lids conductive NB MC

The Newbox Black lid can be handled with one hand and is available in two versions: loose for placing on the container or with hinges and closures. It matches the Euro-Norm container, is easy to handle and the wearing parts can be replaced at any time.

Applications

The Newbox Black lid combined with a Newbox Black container protects the container contents optimally against electrostatic discharge.

NEWBOX BLACK

Dividers conductive NB MC

Newbox Black dividers allow containers to be partitioned flexibly and when used ensure orderliness and provide protection. Thanks to the snap system, the dividers are held together firmly, even during cleaning or removal. The rounded edges and guide grooves make handling easy and comfortable.

Applications

Newbox Black dividers allow containers to be partitioned flexibly and when used ensure orderliness and provide protection in the container.

Suitable for 600x400 mm Newbox Black stackable containers.

AUTOMATIC BLACK

The dimensionally stable Automatic Black together with stackable containers (Blackline Futura) is ideal for automated or manual distribution in the ESD-protected non-food sector. However, the trays and tablets also perform well in semi and fully automated operation and protect your conductive electronic components. The design takes into account both the requirements of modern logistics and the opportunities that today's plastics technology has to offer.

AUTOMATIC BLACK

Containers BL Futura AB MC

The Blackline Futura container is the ESD version of our Automatic Black range. Reinforcements, various handling options and a high degree of dimensional accuracy guarantee trouble-free operation.

These containers run particularly smoothly when being transported on roller conveyors, have optional access openings, and are suitable for both automated and manual handling.

Applications

The Blackline Futura container is ideal for the distribution of ESD-protected non-food products.

Tip

Equipped with the extremely smooth-running and heavy duty **perimeter ribbed base 064**, the Blackline Futura container is perfect for use in fully automated storage systems.

AUTOMATIC BLACK

Trays and tablets conductive AB MC

The conductive trays and tablets are real all-rounders in semi and fully automated handling systems. They enable the smallest manufacturing tolerances to be achieved in fully automated production cells. In addition, they are dimensionally stable, highly precise and extremely durable. They are available both as standard solutions as well as custom-made products.

Applications

The trays and tablets are ideal for transporting conductive electronic components.

OPEN-FRONTED STORAGE BOXES ESD

CLASSICBOX BLACK

The open-fronted storage boxes of the Classicbox Black range are available in six different sizes and this is ideal for the storage and protection of your electronic components. The Classicbox Black boxes offer lots of space for components, are stackable and the ESD versions are designed to be extremely dimensionally stable.

Special types

All non-stock items are marked thus and available on request.

CLASSICBOX BLACK

Open-fronted storage boxes conductive CB MC

Classicbox Black boxes offer an outstanding view of the contents stored. The large and easy to use recessed grips at the front and rear facilitate manual transport. In addition, the smooth underside of the container also ensures quiet movement on the conveyor during automated handling.

Applications

Open-fronted Classicbox Black boxes organise and protect your electronic components and are also perfectly suitable for use with the Kanban method.

Accessories

Practical labels round off the Classicbox Black range.

Tip

We recommend that you also take a look at the section rack systems for open-fronted storage boxes, which leaves almost nothing to be desired where optimal space utilisation is concerned.

BINS FOR SMALL PARTS ESD

VARIOBOX BLACK **FLIPTOPBOX BLACK**

The range of ESD bins for small parts consists of insert boxes (Variobox Black) and hinged boxes (Fliptopbox Black) and protects your electronic components against electrostatic discharge.

The Variobox Black containers can be preconfigured in the stackable container or also ordered loosely for the specific application. They are ideally suited for storing electronic components in stackable containers, but are also suitable singly and individually coordinated in your drawer or cabinet systems.

The Fliptopbox Black bins also provide protection for electronic parts and additionally are outstandingly suited as presentation boxes or promotional gifts.

Special types

All non-stock items are marked thus  and available on request.

VARIOBOX BLACK

Insert boxes conductive VB MC

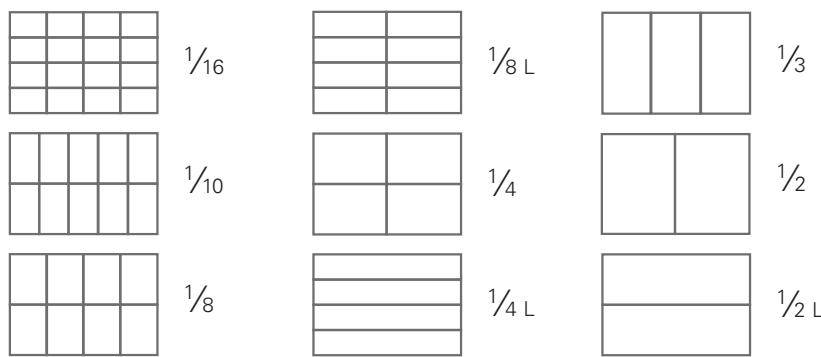

The variable Variobox Black insert boxes ensure reliable storage and safekeeping of small electronic components. The internal radius ensures complete emptying. The cams of the base offer good sliding properties on production chutes and provide a clean support on smooth surfaces. The Variobox Black insert boxes are designed to be conductive and each box can be marked separately.

Applications

The Variobox Black insert boxes protect your electronic components against electrostatic discharge and fit into both the Blackline and the Newbox Black containers.

FLIPTOPBOX BLACK

Hinged box conductive FTB MC

The ESD version of the Fliptopbox Black hinged box is made from dimensionally stable polypropylene. The range covers a total of seven sizes. You can safely and firmly package your electronic components using a lid and box made from a single piece with a snap lock and integral hinge.

Applications

The conductive Fliptopbox models are ideally suited for safely storing and shipping small electronic parts.

Special types

All non-stock items are marked thus  and available on request.

**1308.014** Hinged box FTB MC

Ext. dimensions: **136x87x19 mm**
 Int. dimensions: 130x80x14 mm
 Useable height: 14 mm
 Volume: 0.1 l

Weight: 47 g
 Material: PP
 No. per pallet: 5120 pcs
 No. per pack: 320 pcs

**1814.080** Hinged box FTB MC

Ext. dimensions: **180x140x80 mm**
 Int. dimensions: 178x133x78 mm
 Useable height: 78 mm
 Volume: 1.8 l

Weight: 170 g
 Material: PP
 No. per pallet: 480 pcs
 No. per pack: 60 pcs

**1308.030** Hinged box FTB MC

Ext. dimensions: **136x87x35 mm**
 Int. dimensions: 130x80x30 mm
 Useable height: 30 mm
 Volume: 0.3 l

Weight: 56 g
 Material: PP
 No. per pallet: 2560 pcs
 No. per pack: 80 pcs

**2212.060** Hinged box FTB MC

Ext. dimensions: **225x125x60 mm**
 Int. dimensions: 221x121x55 mm
 Useable height: 55 mm
 Volume: 1.5 l

Weight: 188 g
 Material: PP
 No. per pallet: 576 pcs
 No. per pack: 72 pcs

**1308.050** Hinged box FTB MC

Ext. dimensions: **136x87x55 mm**
 Int. dimensions: 130x80x50 mm
 Useable height: 50 mm
 Volume: 0.5 l

Weight: 65 g
 Material: PP
 No. per pallet: 1792 pcs
 No. per pack: 56 pcs

**MOS 1 MC** Hinged box FTB MC

Ext. dimensions: **118x78x20 mm**
 Int. dimensions: 90x50x15 mm
 Useable height: 15 mm
 Volume: 0.1 l

Weight: 53 g
 Material: PP
 No. per pallet: 2000 pcs
 No. per pack: 250 pcs

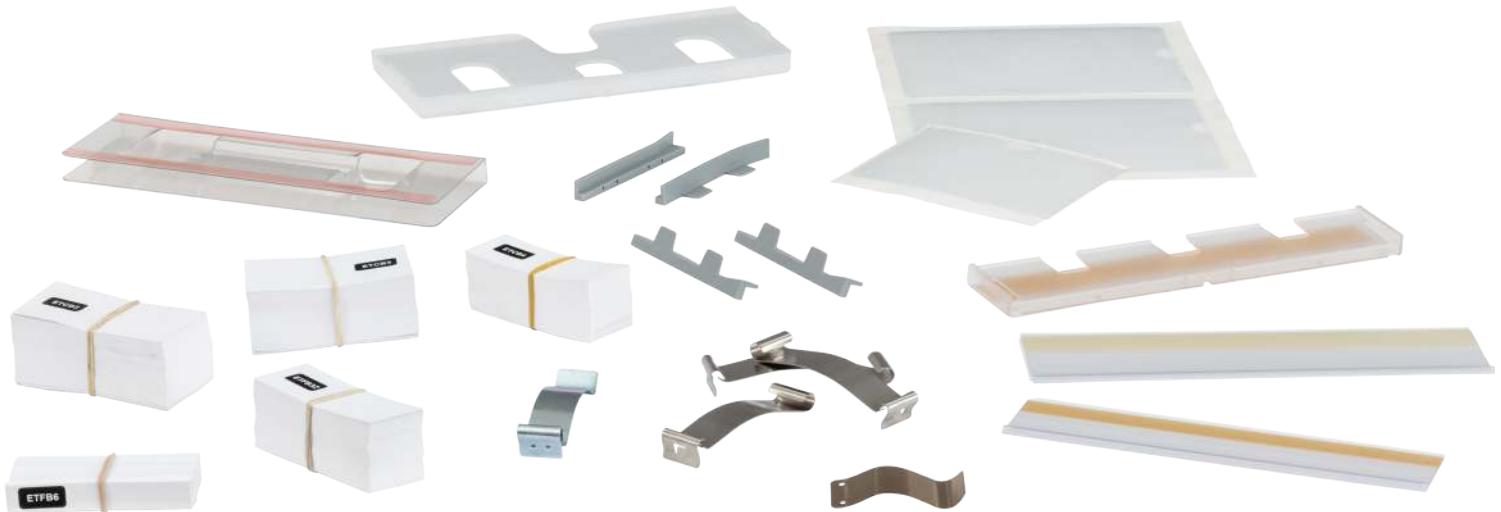

**MOS 2 MC** Hinged box FTB MC

Ext. dimensions: **190x112x20 mm**
 Int. dimensions: 162x95x15 mm
 Useable height: 15 mm
 Volume: 0.1 l

Weight: 135 g
 Material: PP
 No. per pallet: 800 pcs
 No. per pack: 100 pcs

LABELLING & PRINTING

Our range of possibilities for labelling and printing means there are hardly any limits to customising your containers.

Labelling

This section includes the possible ways of labelling stackable containers of the Logiline, Blackline, Newbox and Newbox Black ranges. You will find labels for other product lines in the respective section.

Printing

Hot-air and injection markings are particularly popular for customising stackable containers and open-fronted storage boxes, and they can also be applied to other product ranges.

Special types

All non-stock items are marked thus  and available on request.

Examples of use

Label clips

9980.002 / 001

9980.005 / 004

EH 2

Label pockets

9980.050 / 950

9980.039 / 939

Label holders

9980.085 / 086

9980.121 / 821

9980.046 / 045

EH 4

EH 5

EH 6

Printing

For more information, see Printing section.

LABELLING

To provide you with the perfect solution for identification purposes, we offer labels and label clips in various designs that can be individually attached in different ways.

The RFID or barcode-labels are extremely adherent, scratch-resistant and developed especially for transport containers. They are therefore also suitable for cleaning plant and ultrasonic cleaning.

Suitable for

- Logiline
- Blackline
- Newbox
- Newbox Black

Tip

We will gladly make you offer tailored to your specific requirements. Please contact us and we will be very pleased to advise you.

PRINTING

Refine your containers with your logo or your company name. That way you will also create a good impression on the move.

We hot emboss your company logo according to your template or in standard font letters in the following colours:

It is also possible to carry out marking using injection into the plastic during the production process or also using pad or screen printing.

The durable marking withstands the effects of the production process and the weather and is suitable for modern cleaning plants.

Tip

We will gladly make you offer tailored to your specific requirements. Please contact us and we will be very pleased to advise you.

Examples of use

Hot-embossed marking (with standard lettering)

Hot-embossed marking (with company logo)

Injected marking (with company logo)

STORE ORGANISATION

Products from our Store Organisation range make your internal transport more and protect your goods, and your employees.

Rollboys

Rollboys are an ideal addition for the safe and easy transport of our SGL- and Euro-standard stackable containers (area 600×400 mm). The space-saving rollboys (with or without ESD protection) are made of almost indestructible ABS, are practical, robust and also suitable for heavy loads.

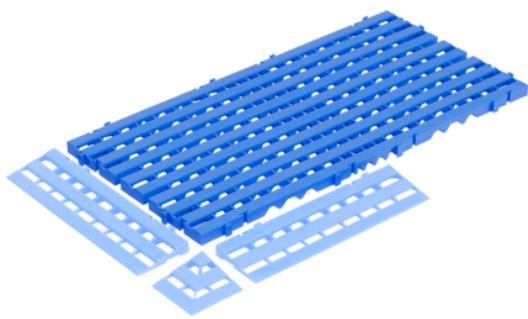

Flore mat

The flore mat grating optimises efficient and reliable shop floor equipment and benefits occupational health and safety and orderliness in equal measure. It is also suitable for use with rollboys.

Special types

List of abbreviations / glossary

In alphabetical order

Codes for base, wall and grip types

000	Closed base (SGL)
007	Closed flat base
25x/45x	Perforated base (SGL)
004	Ribbed base (12.0 mm)
611	Ribbed base (18.5 mm)
626	Ribbed base (15.0 mm)
624	Perimeter ribbed base (15.0 mm)
064	Low-noise, perimeter ribbed base (13.0 mm)
530	Slotted base, reverse stackable (SGL)
STR	Stackable corrugated base
UST	Reverse stackable base
V1	Closed flat base
V3	Perforated flat base
V4	Ribbed base (12.0 mm)
V6	Integrated system base (modularly stackable)
x00	Closed walls
x07	Closed walls
25x/45x	Perforated walls
VI	Walls with one front end open (Vista)
V1	Closed walls
V2	Perforated walls
V5	Walls with one front end open
V7	Walls with one long side open
0xx	Without open grips
2xx	2 open grips
4xx	4 open grips
SM	Without open grips (senza maniglie)
2M	2 open grips (2 maniglie) or 2 carrying grips
3M	3 open grips (3 maniglie)

Codes for product groups (brands)

SBC	Swiss association of bakers and confectioners
SGL	Swiss Logistics Association

Chemical resistance list

Definitions and abbreviations

Codes

a = Very good resistance

When exposed for more than 30 days no, or minor damage.

b = Resistant

In case of prolonged exposure, depending on the type of plastic (hair cracking, mechanical strength, discoloration, etc.).

c = Inconsistent

Can destroy the plastic, deformation can occur.

Substances listed in German only.

Plastics

ABS	Acrylonitrile butadiene styrene copolymer
PA	Polyamide
PC	Polycarbonate
PE-HD	High density polyethylene (hard)
PE-LD	Low density polyethylene (soft)

General Terms of Sale and Supply

I. General provisions

1. Orders only become binding with regard to type and scope of delivery after they have been confirmed by Supplier. Amendments and additions must be made in writing.
2. In the case of ongoing business relationships, these Terms shall also apply to future transactions without any explicit reference being made to them if agreed by the partners in connection with an earlier order. Should other provisions arise on the part of Purchaser or Supplier in place of these Terms, they must be expressly agreed by the partners. Should individual provisions be invalid, the remaining provisions shall remain unaffected.
3. Purchaser's purchasing conditions are only binding for Supplier if explicitly acknowledged by the latter.
4. Information given by Supplier in printed matter and its information on the properties of its products is made on the basis of current technical knowledge and experience. In view of the variety of possible influences on the application of Supplier's products that are outside its control, the user of the product is not exempted from conducting its own tests and examinations. A legally binding assurance with regard to certain properties or the suitability for a specific application cannot be deduced either expressly or implicitly.
5. Supplier reserves the right to make changes to its product range or its products at any time,

II. Prices

1. Unless otherwise agreed, prices are ex works, including packaging, and are subject to value added tax at the respective statutory rate.
2. Country specific additions
 - 2.1 Switzerland (CH) and Liechtenstein (LI)
 - 2.1.1 Deliveries in excess of CHF 2'000.00 net goods value, will be made free-of-charge (Destination CH or LI).
 - 2.1.2 The minimum net value per order is CHF 300.00. A surcharge of CHF 50.00 will be charged for orders below this value.
 - 2.2 EU and non-EU countries (without CH & LI)
 - 2.2.1 The minimum net value per order is € 1'000.00. For orders below this value a surcharge of € 150.00 will be charged.

III. Supply and purchase obligations

1. Delivery times begin upon receipt of all documentation required for the execution of the order and, if applicable, with the punctual supply of material and agreed advance payments.
2. Should an agreed delivery time not be met through the fault of Supplier, Purchaser shall be entitled, to the exclusion of any further claims, to demand appropriate compensation or rescission of the contract following a reasonable period of grace, provided he has given notification of the rejection of the supply when the period of grace was agreed.
3. In the case of ex works deliveries with pick-up by the customer, the goods must be collected within 10 working days. If this deadline is not met, the supplier reserves the right to charge additional storage and handling costs.
4. Reasonable part deliveries and deviations of up to plus or minus ten per cent ($\pm 10\%$) of the order are permissible.
5. Cases of force majeure affecting Supplier or its subcontractors shall extend the delivery time accordingly. This also applies to intervention by the authorities, difficulties with the supply of energy and raw materials, strikes, lockouts and unforeseeable delivery problems, provided they are not attributable to Supplier. Supplier shall inform Purchaser of any such occurrence without delay.

IV. Transfer of risk, packaging and shipping

1. Even in the case of shipments made on a carriage-paid basis, the risk is transferred to Purchaser when the goods leave Supplier's site.
2. In the case of shipment delays attributable to Purchaser, risk is transferred as soon as Purchaser has been notified that the goods are ready for shipment.
3. Unless otherwise agreed, Supplier shall select the packaging and the mode of shipment at its discretion. The goods shall be insured against damage due to breakage, transport or fire at the written request of Purchaser, who shall bear the cost.

V. Provision of material

1. If materials are to be provided by Purchaser, they should be delivered in accordance with the agreed specification in good time at its cost and risk with a reasonable excess quantity of at least five per cent (5%).
2. If these requirements are not met, the delivery period shall be extended accordingly. Except for cases of force majeure, Purchaser shall bear the resulting additional costs, including those for the resultant interruption of production.

VI. Retention of title

1. Deliveries are made under retention of title including the extended retention of title provided this right exists in the legislation of the respective country. Otherwise corresponding agreements shall have to be made.
2. The same applies to deliveries outside the scope of these Terms, provided retention of title or extended retention of title is legally possible in the country in which the goods are located at the time of enforcement. Otherwise Purchaser undertakes to provide Supplier with all rights stipulated under the legislation of Supplier's country to protect claims.

VII. Liability for defects / product liability

1. Defects must be notified in writing without delay and at the latest two weeks after receipt of the shipment. In the case of hidden defects, this period is extended to one week after they have been detected but no more than six months after receipt of the goods.
2. In the case of justified claims Supplier is obliged, at its discretion, to remedy the defect or supply a replacement free of charge. Should Supplier fail to meet this obligation within a reasonable period of time, Purchaser is entitled to a reduction in the purchase price or rescission of the contract. Any further claims shall be excluded. Defective parts that have been replaced shall at the request of Supplier be returned at its expense.
3. This shall be without prejudice to the liability arising from national product liability laws.

VIII. Terms of payment

1. All payments shall be made in the agreed currency exclusively to Supplier according to the agreed payment terms.
2. Should justified doubts arise as to Purchaser's ability to pay, all claims by Supplier shall fall due immediately. In addition Supplier is entitled to withdraw from the contract or demand compensation for non-performance following a reasonable period.
3. In the event of delayed payment, default interest will be payable at a rate of five per cent (5%) without a reminder.

IX. Property rights

1. Purchaser is liable with regard to Supplier for the deliveries and services ordered being free from third-party property rights and exempts Supplier from all related claims and shall be liable for any damages incurred.
2. Design documents, models, etc. from Supplier shall remain the property of Supplier and may only be used or passed on with its consent. Should a delivery contract not be fulfilled due to the fault of Purchaser, Supplier is entitled to appropriate compensation for the preliminary work it has carried out.

X. Place of performance and jurisdiction

1. The place of performance is the location of Supplier's factory.
2. At the discretion of Supplier, the place of jurisdiction is the location of Supplier's factory or the Purchaser's principle office or registered office.
3. The law of the country in which Supplier's factory is located shall apply.
