

LF-1660ESD(SET) Curie Technology
Dual Function Soldering Station

*This 70W, electronically temperature-controlled **Curie Technology** dual function soldering station has been specially designed and developed to meet the present and future lead-free soldering needs of the electronic production industry. It provides all the benefits of temperature regulation and can be easily adjusted between 100 and 480°C.*

Key Features:

- Heater/Sensor Failed Detection*
- Temperature Lock-Out Feature*
- Isolated Holder With Tip Cleaner*
- Low Voltage Output With Safety Operation*
- ESD Safe and Spike Free Circuitry*
- Detachable AC Power Cord With Plug*
- Earth Jack*

Additional Energy Safe Function –

When Unit is use/pending for 10 minutes , the temperature will be drop into 100c to protect the heater and tip life ! Further 10 minutes not use, the system will shut down by itself .Customer need to re-open the main power switch to work again !
