# PRESSURE SENSOR SELECTION GUIDE

# Low Pressure Sensors

Sensata manufactures a variety of low-pressure sensors, suitable for applications like VAV systems, medical devices or filter pressure monitoring. We offer a continuum of pressure package configurations, starting with board mount sensors to ruggedly built industrial packages. Our sensors use PRT or SI Capacitive technologies and can sense pressure from 0 to 15PSI.

# Mid Pressure Sensors

Sensata's mid pressure sensors can sense pressure from 0 to 750 PSI. They come in a variety of different packages, ranging from plastic automotive designs to modular industrial designs. There are multiple housing options, including stainless and plated steel, brass or fiber reinforced PPA. Our sensors are RoHS and REACH compliant, and bear UL and even Drinking Water Safe certifications. Sensata's mid pressure sensors are used in various applications including HVAC, commercial beverage, engine control and construction applications.

# High Pressure Sensors

Built for the toughest industrial environments, Sensata's high pressure sensors provide reliable solutions to a wide variety of applications. Micro Fused Strain Gauge (MSG) sensing technologies are designed to sense pressure from 0 to 8700 PSI, and feature a robust hermetic pressure port design with high burst pressure strength. With extreme shock and vibration capabilities, a wide operating temperature range, and many configurations available; Sensata's high pressure sensors are ideal for industrial applications including injection molding, CO<sub>2</sub> HVAC systems, and other hydraulic or pneumatic applications.

### About us

Sensata Technologies is one of the world's leading suppliers of sensing, electrical protection, control and power management solutions with operations and business centers in twelve countries. Sensata's products improve safety, efficiency and comfort for millions of people every day in automotive, appliance, aircraft, industrial, military, heavy vehicle, heating, air-conditioning and ventilation, data, telecommunications, recreational vehicles and marine applications.
