

# MULTITOOL ACCESSORIES

**Cleaning and Polishing** Dremel cleaning and polishing accessories include brushes, felt accessories, buffing wheels and rubber points.

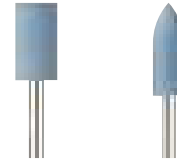

## Polishing accessories

Includes an EZ Speedclic cloth buffing wheel and felt polishing points and wheels. Use with mandrels #401, #402 and SC402.

## Polishing compound

A hard, solid compound used with the felt or cloth accessories to polish metal and plastics. Polishing compound removes a dull oxidation film and/or light surface imperfections.

## Rubber polishing points

For finishing and polishing all ferrous metals (containing iron). Effective on stones and ceramics and on removing small burrs and scratch marks. (3.2 mm shank).

## Impregnated Polishing Wheel

Impregnated polishing wheel for light stock removal and high luster polishing. Works on several materials. Polishing compound is not needed.

## Stainless steel brushes<sup>1)</sup>

Will not cause "after-rust" when used on corrosive-resistant materials like pewter, aluminium and stainless steel.

## Brass brushes<sup>1)</sup>

Non-sparking and softer than steel. They won't scratch soft metal like gold and copper.

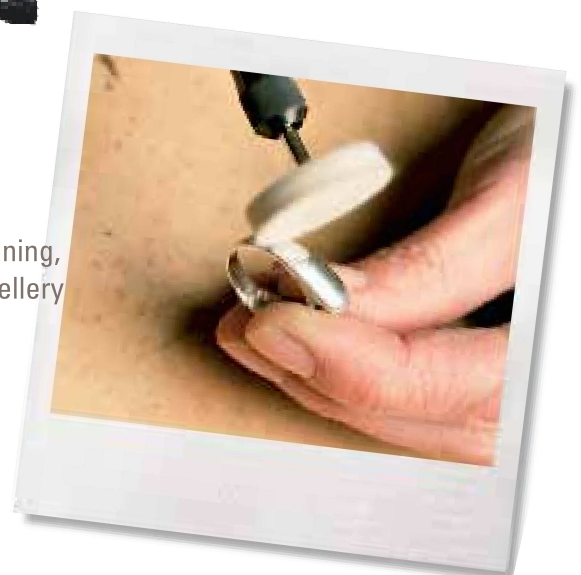

## Carbon steel brushes<sup>1)</sup>

Versatile brush for removing rust and corrosion, polishing metal surfaces.

## Bristle brushes<sup>1)</sup>

Use for light deburring, cleaning, polishing of silverware, jewellery and other precious metals.

<sup>1)</sup> Do not run in excess of 15,000 rpm
