Product Discontinuation Notice for the Rotating Mirror Beacon 883 and the Revolving Beacon 884

Dear Customers,

This letter is intended to inform you about an impending change in our product range.

Due to the EU regulation 2009/125/EC, which restricts the use of certain halogen lamps, we stop the sale for the halogen versions of the rotating mirror luminaire 883 and the rotating beacon 884 and launch a new LED version on the market. The LED version is not only brighter, it also requires less power.

If you have any further demand, please place your last order until **31.07.2021** (as long as stocks last). As the LED versions offer the customer an increased benefit, we recommend an **active change** to the new version. The prices are from **01.01.2021** in the price list.

Your advantages with the 883/884 family:

- WERMA`s brightest light
- Good long-distance effect also in outdoor use
- 40% brighter with lower power consumption than previous products

Please consider following changes:

			
883.100.77	RotatingMirror Beacon BM 115VAC/DC RD		
883.300.77	RotatingMirror Beacon BM 115VAC/DC YE
