

Mounting

When it comes to mounting your navigation device into your car, preferences differ as much as cars do. Perhaps you would like to bring your device closer to you, or put it lower on the dashboard? Or maybe you have a deep windscreen that normally makes mounting difficult? Whatever your car and your preference, TomTom has a solution.

Protection

TomTom carry cases have been designed to offer optimal protection to your device when you're not using it. Robust yet stylish, the materials have been carefully selected to prevent damage from drops, bumps and scratches, to keep your TomTom device looking at its best. Plus, they're all purpose-designed for TomTom devices, ensuring a snug, protective fit.

Charging

TomTom chargers have been designed specially for navigation devices. Unlike generic chargers, TomTom's chargers ensure that your navigation device always gets the right amount of power under all circumstances. Genuine TomTom charging solutions are also safe for your navigation device, so you are sure to get the best out of your purchase, enjoying optimal performance throughout its lifespan.

Combo Kits

TomTom's accessories are designed to be the perfect addition to your TomTom device. And now, we've created a variety of accessory combinations that are designed to suit the needs of different people. From business travellers, to commuters, to new users, TomTom has the perfect accessory kit for you.

Content & Services

Now you can drive smarter, every day - wherever you go. Always drive with the latest map. Be aware of speed cameras ahead. TomTom services offer you the latest and most accurate information on the go.

Smartphone in-car accessories

Make calls on the move and enjoy clear conversation at both ends of the line. An in-built 2-watt speaker gives you quality audio so it's easy to hear both hands-free calls and directions. Your smartphone is securely mounted and fast-charged as you drive. And for short journeys when you don't want navigation or charging, you don't have to dock your phone: Bluetooth® allows you to make and answer calls even when your phone is in your pocket. Safe, convenient and hands-free. To learn more, visit tomtom.com/smartphone.
