- Table power strip in innovative, two-part design with illuminated, two-pole safety switch and practical clamping function for optimum power supply in the home office or at the workplace

- The desktop unit has 2 socket slots as well as 2 slots for Keystone modules - with the matching Keystone module you can integrate the port you need into the socket strip without tools - maximum connection flexibility
- A further 8 socket slots are located under the table for optimum power supply to your appliances - Socket outlets with earthing contact and increased protection against accidental contact in 45° arrangement, also suitable for angled plugs
- The power socket strip with high-quality stainless steel finish enables a neat and practical power supply at the workplace
- The extension lead with 2m cable H05VV-F 3G1.5 is suitable for table thicknesses of 16-45mm and can be fixed by tightening the screws - anti-slip pads ensure an ideal hold on the table

Description

The two-part brennenstuhl®estilo Power Strip with two-pole switch and high-quality stainless steel surface brings order to your home. The table power socket can be adapted to table thicknesses of 16-45mm and anti-slip pads provide an ideal grip. The extension lead offers two socket slots above the table as well as two slots for Keystone modules. With the matching Keystone module, you can integrate the port you need into the socket strip without tools, offering a high degree of connection flexibility. A further 8 socket slots are available on the underside to keep the workstation neat and tidy. The protective contact sockets are arranged at 45° so that the power strip is also ideally suited for angled plugs. It also convinces with the following features:

- Cable length 2m
- Cable designation: H05VV-F 3G1.5
- Shapely, innovative, two-part design
- Sockets with increased contact protection
