

## 2x12 Flywires: Signal Cable Assembly for the Analog Discovery Pro 3000 Series

---

**SKU:**  
240-143

The 2x12 MTE (Measurement and Test Equipment) Cable provides a simple connection method from any of the instruments on the [Analog Discovery Pro 3000 Series](#) to a circuit under test. The 24 female-terminated wires are color-coded and can be used as is, in conjunction with a pin header gender changer to probe a female connector, or connected directly to breadboard wire.

One 2x12 MTE Cable is provided with the Analog Discovery Pro 3000 Series, but it can be useful to have additional cables for testing multiple devices or in the event that it needs to be replaced.

- One 2x12 keyed female MTE connector compatible with the [Analog Discovery Pro 3000 Series](#)
- Female-terminated probe ends
- Probe wires 220mm±5
- Color Coded to match the device Pinout
