

## FEATURES

- Rounded probe tip
- Made of phosphor bronze
- Contact resistance of 30 m $\Omega$
- Current rating of 3 A
- Length of 24.7 mm
- Pitch of 2.54 mm
- Spring pressure of 1.47 N(g)

## RS PRO Rounded, Test Probe, 3A

RS Stock No.: 261-5092

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

## Product Description

These high-quality spring test probes are designed to test a printed circuit board (PCB). They each come with a spring-loaded probe tip with a rounded head, which provides positive contact without leaving any marks or indentations.

The probes are used with a receptacle that you can order separately. Using separate probes and receptacles makes it easy to replace a damaged probe without disturbing your wiring. Receptacles can be push-fitted into the mounting plate, which provides an airtight seal without the use of any adhesives.

## General Specifications

<b>Body Material</b>	phosphor bronze
<b>Probe Tip Type</b>	Spring Loaded
<b>Applications</b>	Test lands, pads, leads and holes Penetrates oxides and fluxes as well as contaminated boards

## Electrical Specifications

<b>Current Rating</b>	3A
<b>Contact Resistance</b>	30mΩ

## Mechanical Specifications

<b>Pitch</b>	2.54mm
<b>Length</b>	24.7mm

## Approvals

<b>Compliance/Certifications</b>	EN61340
