

FEATURES

- High abrasion and mechanical resistance
- Excellent resistance to chemicals including oils, fluids and aggressive chemical agents
- Halogen free
- 1kV dielectric strength
- Good temperature
 resistance
- Maintains electrical properties after flexing
- Good resistance to fraying when cut
- Compatible with most insulating varnishes

RS PRO Braided Acrylic Fibreglass Black Cable Sleeve, 4mm Diameter, 5m Length

RS Stock No.: 398-852

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

From RS PRO a high-quality Class F braided fibreglass cable sleeving or cable tubing impregnated with an acrylic resin to create a tough but flexible insulation material that offers highly effective cable protection. This cable sleeving has excellent chemical resistance along with a good temperature resistance and high electrical and mechanical strength. The sleeve is made from halogen-free materials so it won't release toxic gases into the atmosphere when burnt and has excellent compatibility with Class F impregnating resins. This cable sleeve is easy to apply by simply routing your cables and wires through the inside. The flexibility qualities of this sleeving mean it is still able to maintain its electrical properties even after flexing.

General Specifications

| Material | Acrylic Fibreglass | |
|----------------|---|--|
| Colour | Black | |
| Braided | Yes | |
| Expandable | No | |
| Fire Behaviour | Halogen Free | |
| Applications | Laboratories, Chemical processing, Appliance manufacturing, Medical and pharmaceutical, Automotive and marine applications, Building and construction industry, Food and beverage industries | |

Mechanical Specifications

| Sleeve Diameter | 4mm |
|------------------------|-------|
| Sleeve Length | 5m |
| Wall Thickness | 0.3mm |
| Maximum Cable Diameter | 4mm |

| Property | Test Method | Typical Value |
|---------------------|-------------|---------------|
| Dielectric Strength | - | 1.5kV/mm |

Operation Environment Specifications

| Operating Temperature Range | -25°C to 155°C |
|-------------------------------|----------------|
| Minimum Operating Temperature | -25°C |
| Maximum Operating Temperature | 155°C |

Approvals

| Compliance/Certifications | RoHS |
|---------------------------|-----------------------------|
| Standards Met | IEC 60684-3, RoHS Compliant |

| DIELECTRIC STRENGTH | | |
|---------------------|-------------------------------------|-------|
| Test | Method | VAC10 |
| IEC 60684 | 250 mm.Inst. B/D Central Value (kV) | 0.8 |
| IEC 60684 | 250 mm.Inst. B/D Central Value (kV) | 0.7 |

| TECHNICAL TABLE | | |
|-----------------|---|---|
| Property | Test | Result |
| Heat Resistance | Bending after heating, IEC 60684 Part 2 Clause 13, 48 hours at 180°C | No cracking or detachment of coating shall be visible and the original colours shall be clearly recognisable |
| Flammability | Flame propagation, IEC 60684 Part 2 Clause 6, Method A, Vertical with mandrel | Extinguishes within 60 seconds |
| Cold Resistance | Bending at low temperature: IEC 60684 Part 2 Clause 14 at -70°C | No cracking or detachment of coating shall be visible |

| DIMENSIONS | | | |
|-------------------|---------------------|-----------------------------|--|
| Nominal Bore (mm) | Bore Tolerance (mm) | Minimum Wall Thickness (mm) | |
| 0.5 | +0.20 | 0.20 | |
| 1.0 | +0.20 | 0.25 | |
