Flash Builder Prem 4.7 Multiple Platforms EU English COMMERCIAL ESDSoftware Download inkl. Activation-Key

Adobe Flash Builder 4.7 software is a development environment for building games and applications using the ActionScript language and the open source Flex framework. Flash Builder Premium includes professional testing tools such as profilers, network monitoring, and unit testing support.

Key Selling Points

- Develop games with ActionScript - efficiently build high-performance games using the ActionScript language
- Code faster - reduce the time from concept to delivery with robust coding tools and comprehensive templates
- Deliver native experiences - provide a better experience to end users across desktop and mobile platforms
- Easily debug and test - help ensure a quality experience while reducing testing time with powerful testing tools

Product Features

Coding

Develop games more quickly with Flash Builder 4.7 thanks to advanced code hinting, code refactoring, and quick-assist templates.

Multi-threading

Create ActionScript workers easily with a wizard-based interface, updated debugger, and build packaging support in Flash Builder 4.7.

Deployment and testing

Efficiently deploy, debug, and profile iOS and Android apps via USB and Wi-Fi directly from the Flash Builder IDE.

Powerful code editing

Speed coding through syntax coloring, statement completion, code collapse, refactoring support, live highlighting of invalid references, and interactive step-through debugging.

Code generation

Use QuickAssist/Fix to rename and manipulate variables, generate getters/setters and event handlers, organize imports, and more. Use the override/implements feature to define methods from a superclass or interface.

Code templates

Use over 100 best-practice code templates for ActionScript, MXML, and CSS. Review and insert templates using code assist. Create custom templates and import or export them for sharing within teams.

Mobile application packaging and signing

Package and sign applications as platform-specific installer files for upload to application stores.

Captive runtime

Increase installs rates and reduces testing costs by bundling the runtime with applications.

Mobile app debugging

Debug and test applications on locally connected mobile devices or a mobile emulator.

Memory and performance profilers

Accelerate application performance using memory and performance profilers that monitor and analyze memory consumption and CPU cycles.

Main Specifications

Product Description	Adobe Flash Builder Premium (v. 4.7) - licence - 1 user
Product Type	Licence
Category	Development tools - web applications
Version	4.7
Licence Qty	1 user
Licence Pricing	Commercial, Consignment, indirect
Licensing Details	ESD
Platform	Windows, MacOS
Language	EU English

Extended Specification

General

Category	Development tools - web applications
Product Type	Licence
Version	4.7
Platform	Windows,MacOS
Distribution Media	Download
Language	EU English
Min Supported Colour Depth	16-bit (64k colours)

Licencing

Licence Type	1 user
Licence Pricing	Commercial,Consignment,indirect
Details	ESD

System Requirements

Supported OS	Apple MacOS X 10.6,Microsoft Windows XP SP3,Microsoft Windows 7 (32/64 bits),Apple MacOS X 10.7 Lion,Windows 8,Apple MacOS X 10.8
Hardware Requirements	Microsoft Windows - 2 GHz - RAM 2 GB - HD 5 GB Apple MacOS X - RAM 2 GB - HD 4 GB
Additional Requirements	16-bit graphics card,1024 x 768 monitor resolution,Java Runtime Environment 1.6 or later
