

Catline

TV via network cable (CAT 5/6)

- Adjustable gain
- Sloped outputs
- 4 adjustable RJ-45 outputs
- Up to 50m cable distance
- 3 terminators included

A unique solution for distribution of TV via copper cable (CAT5/6).

TVB-02 has a built in amplifier and adjustable levels for all 4 output ports. This is the only existing product in the marketplace where you can adjust the output level per port. This means that you separately can compensate for the different cable distances in between the amplifier and the RJ-45 outlets. The high output gain gives you up to 50 meter cable distance at 860MHz. TVB-02 can be installed direct to the wall or in 10" respective 19" panel.

TV-cable

Cable with built in transformer for converting from Ethernet (RJ-45 female) to coaxial (IEC-male). To be used for distribution of analogue/digital TV via CAT-5/6 cable. TVB-01 is also perfect for distribution of IP-services over an existing coaxial cable.

Part nr: 380 00 03 Catline 19"-panel for
1-2 TVB-02 (includ. blind panel)
E-nr: 51 777 74

Technical specifications		
Part no	–	380 00 02
Type	–	TVB-02
Frequency range	MHz	47–862
Flatness	dB	±0,75
Impedance		
Input	ohm	75
Output	ohm	100
Gain 47-860MHz	dB	35 (max)
Noise	dB	<8
Adjustable attenuation		
Input	dB	0–20
Output	dB	0–20
Adjustable slope	dB	0–18
Output level,		
42Ch CENELEC	dBµV	98
Return loss		
47–862 MHz	dB	>13
Isolation, port-port	dB	>20
Group delay	ns	<30
Testpoint	dB	–20
Power	V DC	5 (via included adapter)
Power consumption	mA	800
Temperature range	°C	–20 till +60
Screening	–	class B
Connectors		
input	–	F-female
outputs	–	RJ-45 female
Dimensions (LxBxH)	mm	200 x 41 x 38,2

Coming products:

Catline, HDMI via copper cable

Catline, 8-ports PBX-switch for telephony and door phone system

Catline, Gigabit router for data

Technical specification		
Part no	–	3800001
Type	–	TVB-01
Frequency range	MHz	47–862
Loss	dB	<5
Screening	–	class B
Connectors		
outlet	–	RJ-45 male
TV	–	IEC-male
Length	m	2

19"-panel

For installation of one or two amplifiers TVB-02. A blind panel is preinstalled if only one amplifier is needed.

Part no	380 00 03
Type	19"-panel
Height:	46 mm
Length	19" (483 mm)

10"-panel

For installation of one amplifier TVB-02 in a 10" cabinet.

Part no	380 00 04
Type	10"-panel
Height	46 mm
Length	10" (254 mm)

Terminator, 100 ohm RJ-45

For installation in amplifier TVB-02. All not used ports have to be terminated with a terminator.

Part no	380 00 05
Type	terminator, 100 ohm RJ-45
Impedance	ohm 100
Connector	RJ-45, male
