Material properties	Mold-resistant, washable polyester
Warranty	1year bring in

The **Acer M90-W01MG Rollo Screen** is ideally designed for use in combination with the Acer DLP projectors thanks to the gain factor of 1.0.

The black border of the image area leads to an increased contrast and the black back prevents unnecessary loss of light.

If you no longer need the screen, it can simply be rolled up in the transport housing and disappear in the box.
