

# AirPods 3rd generation

---

 [apple.com/airpods-3rd-generation](https://apple.com/airpods-3rd-generation)

## **Bass hits an all-time high.**

---

An Apple-designed dynamic driver, powered by a custom amplifier, renders music in exceptionally detailed sound quality — so you revel in every tone, from deep, rich bass to crisp, clean highs.

## **Taking sound in totally new directions.**

---

Spatial audio with dynamic head tracking places sounds all around you to create a three-dimensional listening experience for music, TV shows, movies, and more — immersing you in sounds from every direction so it feels like you're in your very own concert hall or theater.<sup>1</sup>

## **Music on a more personal note.**

---

Adaptive EQ automatically tunes music to your ears. Inward-facing microphones detect what you're hearing, then adjust low- and mid-range frequencies to deliver the rich details in every song, customized for you in real time.

The force sensor gives you even more control over your entertainment. You can press to play, pause, and skip through songs, or answer and end calls.

## **You heard it here first. HD voice quality for FaceTime.**

---

Connect on FaceTime in crisp, HD quality with a new AAC-ELD speech codec. And with support for spatial audio, Group FaceTime calls sound more true to life than ever.

## **An instant connection.**

---

Place AirPods near your iPhone or iPad and tap Connect to pair with every device in your iCloud account. If you're playing music on your Mac, you'll be able to answer a call on your iPhone — without having to switch devices.<sup>7</sup>

## **Audio Sharing.**

---

Easily share a song or show between any two sets of AirPods. Simply bring AirPods near the iPhone, iPad, or Apple TV you're listening to and connect instantly.<sup>9</sup>

## **A case full of energy.**

---

Wirelessly and effortlessly recharge the MagSafe Charging Case on a MagSafe charger.<sup>3</sup> Fully loaded, the case gives you up to 30 hours of total listening time.<sup>4</sup> And charging AirPods in the case for just 5 minutes generates around an hour of listening time.<sup>5</sup>

It shrugs off sweat and sprinkles,

and delivers an

experience that's

simply magical.

## **Mute the breeze.**

---

Covered in a special acoustic mesh, an inset microphone in each earbud minimizes wind noise when you're on a call — so your voice is always heard loud and clear.

## **Style from ear to ear.**

---

With a contoured design and shorter stem, AirPods are designed to direct sound into your ears — in a refined look anyone can appreciate.

## **A great sense of detection.**

---

An enhanced skin-detect sensor knows the difference between your ear and other surfaces, so audio only plays when you're wearing AirPods — and pauses when they're in your pocket or on a table.

## **Enhanced Find My.**

---

Track down your AirPods with the Find My app. See how close they are with proximity view, get separation alerts if they're out of Bluetooth range — or have them play a sound so you can locate them.

“New message from Lisa. Would you like to reply?”

## **Announce Notifications.**

---

Siri can read your important messages or alerts as they arrive — and you can even reply to messages with just your voice.<sup>8</sup>

## **Sprinkles?**

## **No sweat.**

---

Both AirPods and the MagSafe Charging Case are rated IPX4 sweat and water resistant, so they'll withstand anything from rain to heavy workouts.<sup>2</sup>

## **Use AR to see the new AirPods.**
