

PC Power Supply ATX 350 W Fan 8 cm

General information

This 350W computer supply can perfectly be used for the AMD and Pentium systems and can be placed in almost every computer case. This power supply has both a CE approval and the passive PFC. A 8cm fan regulates the airflow so the power supply does not overload and overheat. The power supply is equipped with a 24/20 pins power connection for the main board.

PAY ATTENTION: Feeding works only when connected to the motherboard or PSU tester, this is the standard security procedure

Specifications
