

TEX-E - Triple insulated copper wire
CU-TIW 100/0,25

Advantages

No additional insulation between primary and secondary is necessary, please consider the relevant standards

Solderable without prior stripping

Applications

TEX-E wires are used as insulated wires in inductive components. Please consider the relevant standards.

Picture shows CU-TIW-100/0,90

Approvals

TEX-E - Triple insulated copper wire

CU-TIW 100/0,25

Type

CU-TIW 100/0,25

Type

CU-TIW 100/0,25

Electrical data

Mechanical data

Operating data

Resistance 382.5 Ω /km

Environment

Heat resistance 248 °F (Cl.E), UL: 266 °F

Measures and weights

Wire diameter 0.010 inch

Tolerance ± 0.008 mm

Major diameter \varnothing (max.) 0.01839 inch

Length m (min.) 156.5

Weight 0.22 lbs

Weight 0.575 kg/km

Subject to change.
