

## Applications

### Industry

#### Maintenance manager

- Corrosion in rotors and stators
- Equipment part N°
- Cable pulley/pulley slots condition
- Liquid channel inspection
- Material integrity

#### Assets

- Pumps
- Motors
- Gear boxes
- Compressors
- Turbines

### Production

#### Mechanical maintenance teams

- Quality of finished goods
- Inspect bearing surface and lubrication
- Gear helix inspection

#### Assets

- Factory MIA goods
- Conveyors
- Roller bearings
- Production line rotating machinery
- Gear boxes

### Aviation

#### Aircraft maintenance technician

- Inspect blades for chips or cracks
- Engine hot section contamination
- Foreign/loosened micro parts
- Leakage from lubrication lines

#### Assets

- Engine sections
- Airframes
- Flaps
- Turbines
- Hydraulic lines
- HP sections

### Heavy duty

#### Industrial maintenance team

- Clogged pipelines
- Cracked industrial fluid lines
- Condition of large waste lines
- Ventilation ducting

#### Assets

- Sewer lines
- Industrial pipelines
- Off shore structural components
- Industrial HVAC systems

### Automotive

#### Quality assurance manager

- Quality/reliability testing of casting goods
- Piston dome/cylinder/valve condition
- Inspect for crack, chips and contamination in HP chambers

#### Assets

- Casting goods
- Combustion chambers
- Engines

**Preventive maintenance simplified. Rework eliminated.**

Save time and improve the reliability of your maintenance data by wirelessly syncing measurements using the Fluke Connect® system.

- Eliminate data-entry errors by saving measurements directly from the tool and associating them with the work order, report or asset record
- Maximize uptime and make confident maintenance decisions with data you can trust and trace.
- Access baseline, historical and current measurements by asset

The Fluke DS703 FC is part of a growing system of connected test tools and equipment maintenance software.

**The benefits of a videoscope are well known.** But industrial inspections require a powerful diagnostic videoscope designed to stand up to the dirtiest, most harsh environments.

- High definition probe with dual-view camera
- Processing speeds that render a smooth, clear, consistent image
- 7" LCD screen for easy viewing
- Macro to micro zoom function
- Adjustable lighting to capture the best image
- Up is Up® technology for an appropriate orientation, regardless of the probe location (8.5 millimeter, 1.2 meter probe only)

Fluke Diagnostic Videoscopes put high-resolution images in the palm of your hand.
