Inclinometers

## Inclinometer

The inclinometer IS40 permits 2-dimensional inclinations to be measured. Versions are available for the measuring ranges $\pm 10^{\circ}$, $\pm 45^{\circ}$ or $\pm 60^{\circ}$.

The compact robust construction makes this sensor the ideal device for measuring angles in harsh environments.

## Innovative

- Rugged construction
- High resolution and accuracy
- Current or voltage interface
- High shock resistance
- Zero point adjustment
