

HD IP Camera 1280x720 Panorama White/Black

General information

Secure your home discretely with this König HD panorama camera.

The camera is equipped with a fisheye lens. This enables a 180° panoramic view covering the entire room, which means that the camera in itself does not move.

This, together with a compact design, ensures dedicated low-key camera observation.

Perfect to keep an eye on your children, for example.

Receiving notifications, viewing both live and recorded footage and zooming in for a more detailed image all work via a free app on your smartphone.

Images are also recorded 24/7 to a MicroSD card so you never have to miss a thing.

Features

- Compact design / zooming in via smartphone for low-key observation
- 24/7 recordings stored on MicroSD card (up to 128 GB)
- Motion detection with notifications
- 180° fisheye lens for 100% panoramic coverage of a room
