

## PRF 301 Silicon Spray

PROTECTIVE LUBRICANT

Technical information

Chemical substance:

Naphtha(petroleum), Polydimethylsiloxane

Propellant: Propane, Butane

Colourless formula

### Applications

Protective lubricant intended for rubber and vinyl components. Suitable, for example, for sealing rings and sealing strips. Excellent car door seal enhancer. Recommended operating temperature -40°...+315°C.

### Directions

Shake before use. Spray evenly from a distance of 15-20cm. Use the extension tube for optimal dosage. Repeat the treatment of seals and rubber parts regularly to maintain the protective effect. Shelf life is 36 months from the date of manufacture.

### Ecological information

Hazardous to aquatic life. Verify the exact information from the safety data sheet.

### Product information

Product code: PE30122

Net volume: 165ml

Package: Aluminium aerosol canister

Extension tube: Yes

Sales unit: Carton/12 cans

UFI: YS8X-T8U3-S004-1U37

UN number: 1950

Transport class: 2.1
