Safety Fuse 10 A/600 V; 6,3 x 32 mm

Modern Safety Fuses with ceramic body provide a much higher level of protection against damage to the measurement devices when triggered, than regular glass fuses.

Blown fuse may only be replaced with spare fuses of the same type and specifications to ensure the safety of the devices and thus the safety of the user during following measurements.

This small dimensioned fuse with 6,3 x 32mm size has a dielectric strength of up to 600 V.

Rating current (A)	10 A
Rating voltage (V)	600 V
Response characteristics	Very fast acting (FF)
Operation class	GS
Packaging unit (PU)	10 pce.
Dimensions	6,3 x 32 mm
Suitable for	P 3335 / P 3340
EAN-13	4250569403736
