Measurement Equipment Set "Environment"

In education and training, as well as for interested home users, various environmental measurement functions are indispensable. Therefore, this new series of environmental instruments in a sturdy carrying case is a comprehensive collection of practical instruments.

The PeakTech 5160 is a compact device for measuring the humidity and air temperature and therefore ideally suited to determine the indoor climate in the house area, or in horticulture and plant breeding to check the air conditions.

Whereas the measurement of the light intensity in Lux can be carried out with the new PeakTech 5165, as it is needed in the horticultural field of occupational safety.

The Vane-Anemometer PeakTech 5170 can detect wind speeds up to 90 km/h, also this device warns the user in cool temperatures of a "Windchill".

The new PeakTech 5175 can be used to measure the sound level, whereby this device has an automatic measurement range from 30 dB to 130 dB in A-weighting.

These handy measurement devices can be safely transported to your working site with the PeakTech 7265 carrying case and protected from dust and rain, as well as from hard knocks and impact damage.
