

Spring-Loaded Thermocouple with Copper Disc Tip

Features

- 316 Stainless Steel Air Probe with a vented sheath for general air temperature
- Suitable for use in various environments, including industrial settings and food applications
- Designed with a sharp, pointed tip, the probe is ideal for inserting into solids, liquids, and semi-solids to accurately measure their internal temperatures

Specification

Sensor Type	Copper Disc Probe
Thermocouple Type	K
Probe Tip Type	Copper Disc Tip
Probe Diameter	4.7 mm
Probe Length	63 mm
Cable Length	2 m
Cable Material	Polyurethane
Cable Termination	Mini Plug
Maximum Temperature Measurement	600 °C

Art. Nr.

RND 410-00320
