

# Thermocouple Surface Probe Type K IEC

## Features

- Designed specifically for measuring the temperature of surfaces, this probe features a flat, sensitive tip that ensures accurate and reliable readings without the need for penetration
- This probe employs a Type K thermocouple, which is known for its wide temperature measurement range
- The probe is constructed with materials that can withstand high temperatures, making it suitable for use in environments where heat resistance is crucial

## Specification

Sensor Type	K
Probe Tip Type	Ceramic Tip, Coiled Element
Probe Diameter	12 mm
Probe Length	90 mm
Cable Length	2 m
Cable Material	Polyurethane
Cable Termination	Mini Plug
Maximum Temperature Measurement	900 °C

**Art. Nr.**

**RND 410-00322**
