

Thermocouple Right Angled Surface Probe Type K

Features

- Designed specifically for measuring the temperature of surfaces, this probe features a right-angled tip that allows for close contact with flat surfaces
- Equipped with a Type K thermocouple, this probe offers a broad temperature measurement range
- Crafted with durable materials, this probe is built to withstand the harsh conditions often encountered in industrial settings

Specification

Colour Code	K
Sensor Type	K
Probe Tip Type	Ceramic Tip, Coiled Element
Probe Diameter	12 mm Tip
Probe Length	180 mm
Cable Length	2 m
Cable Material	Polyurethane
Cable Termination	Mini Plug
Maximum Temperature Measurement	900 °C

Art. Nr.

RND 410-00323
