

Neodymium Disc Magnet

Features

- High coercivity (Hci) to resist demagnetisation
- Strongest magnetic performance
- Lightweight and compact because of the high energy density of the magnet material
- Can be used in boxes,bags,toys,stationery folders, scale models, homemade arts and industrial applications

Specification

| Material | Neodymium Magnet | | |
|----------------------|-------------------|-----------|--------------------|
| Magnet Type | Disc | | |
| Grade | N35 | | |
| Coating | Ni-Cu-Ni | | |
| Magnetized Direction | Through thickness | | |
| Part No. | Diameter | Thickness | Net weight (g/pcs) |
| RND 610-00885 | 5 mm | 5 mm | 0.73 |
| RND 610-00886 | 10 mm | 8 mm | 4.7 |
| RND 610-00887 | 14 mm | 8 mm | 9.2 |
