Verbatim MDISC

Lifetime archival BDXL 100GB - 5 pack jewel case

## Overview

Verbatim MDISC is the new standard in digital storage designed to preserve and protect your files by engraving your information into a patented “rock-like” layer, resistant to light, temperature, and humidity.

Industry standard ISO/IEC 10995 tests carried out by Millenniata showed the expected mean lifetime of an MDISC to be 1,332 years, with just 5% of discs showing signs of data loss after 667 years. Therefore the projected lifetime is expected to be several hundreds of years.

BDXL 100GB capacity makes archiving essential data easier for home users as well as business & enterprises users.

MDISC BDXL discs incorporate titanium for added longevity. Combined with the MDISC patented “rock-like” recording layer this provides ultimate protection for your precious memories & data.

A BD-XL Blu-ray writer is required to write data to the discs.

## Product Details

Part Number: 43834

### **Customise your disc - Printable**
