

SIEVI ROLLER+ S3

43-52156-112-08M

36-38 EN ISO 20345: S3

43-52156-113-08M

39-47 EN ISO 20345: S3

The Boa® system provides comfort for users of safety footwear: just a turn of the button and you can adjust the footwear to fit your feet perfectly. It is also fast and easy to take the shoes off: the closure unlocks just by lifting the button.

Toecap, composite

Toecap made of composite material is completely metal free and fulfills the requirements of the EN ISO 20345 standard. The toecap insulates well against heat and cold.

Penetration resistant midsole, composite

The penetration resistance fulfills the same EN ISO 20345 requirements as traditional midsole made of steel. Steel, however, gives greater penetration resistance, which is why Sievi recommends a steel midsole for the more demanding conditions (e.g. construction industry).

Resistance to oil and many chemicals

Sievi's sole resists oil and many chemicals. The oil resistance of Sievi footwear meets the requirements of the EN ISO 20345 standard.

Antistatic

Footwear designed with antistatic features, discharges the body's static electricity up to tolerances of 100 kΩ - 1000 MΩ.

Water repellent

Sievi uses water-repellent leather. Its water resistance meets the requirements of the EN ISO 20345 standard.

FlexStep® – Superior shock absorption under the whole foot

The FlexStep® sole construction eliminates stress and shocks to the feet and spine, helping to avoid the foot and back pain that can reduce work efficiency and quality of life. FlexStep® sole is proven to be a more comfortable and safer way to eliminate impacts.

Sole material PU/TPU

The double density sole consists of polyurethane and elastic thermoplastic polyurethane. The outsole is wear resistant and the mid-layer is of shock absorbing FlexStep® material.

ESD

Through its sole construction, ESD footwear provides a safe and controlled method of discharging the body's static electricity. The tolerances for the resistance of Sievi footwear are stricter (100 kΩ-35 MΩ) than for ordinary antistatic footwear (IEC 61340-5-1).

Dry feet with 3D-dry 3D-dry lining, developed by Sievi, transfers moisture from the foot to the second layer of the lining and further through the upper and away from the shoe thus keeping your feet drier and more comfortable.

DUAL insole

The Sievi DUAL Comfort insole has shock absorbing cushions made of PORON® material which aids comfort to your feet and back.

BOA® Closure System – more user comfort

Easy to use and durable, the patented Boa® Closure System significantly increases the wearer comfort of the footwear. Turn the button to achieve the perfect fit.
